agencies already ordered by Government the Agricultural Demonstrator is expected to be relieved of this work and to settle down to his normal duties in the regular line.

Recommendation in item (2) in para 1 above.

The posts of Superintendents of Research Stations are advertised in the Madras Agricultural Service as an Assistant

Research Officer in the category of Geophar Madras.

Agricultural Services and according to the special rules for the Madras Agricultural Service a candidate for appointment to the post by transfer should possess inter alia experience for a period of not less than five years in the Madras Agricultural Subordinate Service as an assistant in a Crop Breeding section. The posts are selection posts and selections are made in consultation with the Public Service Commission. It will thus be seen that recruitment to posts of Superintendents of Agricultural Research Stations from subordinates of merit in the crop Breeding Sections is already the practice in circulation.

Recommendation in item (3) in para 1 above;

The Government accept the recommendation. The Director of Agriculture is requested to post in future upper subordinates of the Research Branch only to Agricultural Research Stations.

Recommendation No. 4 in para (1) above.

The Director of Agriculture considers that as there is a dearth of qualified Agricultural graduates the question of giving them two years training in

in the Agricultural Farms after being posted to the Agricultural branch by creating super-numerary^{ary} ~~leaf~~ posts may be deferred for the present and the question taken up when the time becomes more prosperous. The Government agree with the Director of Agriculture. The old rules for the Madras Agricultural service required inter alia that an upper subordinate should have put in atleast one Year's service as Farm Manager of an Agricultural Research station. for appointment as District Agricultural Officer. That requirement is no longer in force. The Director of Agriculture is therefore requested to see that intensive training for at least two months is given to recruits at an Agricultural Research station before they are put in charge of taluks and necessary provision made in para 229 of the Madras Agricultural Departmental Manual. This point may also be borne in mind in respect of the permanent allotment of upper subordinates to the Agricultural and Research sections respectively which is separately under consideration.

(BY ORDER OF HIS EXCELLENCY THE GOVERNOR)

N. Murugesu Mudaliar,
Deputy Secretary to Government

To

The Director of Agriculture.
